

PREMIER LOCKERS

Our Premier range of lockers offers a hard wearing solution that is as versatile as our steel range with a wide range of vibrant Arpa SGL colours to complement your interior design.

FEATURES

GARRAN LOCKERS

A range of lockers with Solid Grade Laminate (SGL) doors fitted to a steel carcass with a bolt through supercoated hinge. This gives you a locker with the combined advantage of SGL doors combined with the strength of the spot welded steel carcass. The result of this marriage is an extremely robust locker built to resist vandalism at an affordable price. Available in the full range of standard sizes with a flat or sloping top. The sloping top is an integral part of the locker not just an addition.

1 TIER LOCKERS

Sizes as per the Classic Range. Internal fittings include a hat shelf at 350mm down from top, and two hooks below, or a coat rail with one hook if the locker is 450mm deep or more.

2 TIER LOCKERS

Sizes as the Classic Range. Internal fittings include two fixed coat hooks in each compartment.

3+ TIER LOCKERS

Sizes as the Classic Range. This locker has no internal fittings.

- Manufactured and constructed from 0.7 steel carcass and a 10mm solid grade laminate door (SGL)
- Ideal for the education sector or areas where the lockers are a feature.
- Hard wearing SGL means less replacement doors required.
- A wide range of vibrant colours available from our Arpa range of SGL.
- Cosmetically pleasing for highly visible areas.
- Easy to clean
