

## FEATURES

**GARRAN**LOCKERS

### Ultimate durability for the harshest environments

- Provides a practical and cost effective alternative to more expensive stainless steel options
- The carcass is manufactured from one piece of 1.5mm aluminium flat sheet, as used in the automotive industry 5754H22. Available on all lockers up to 450mm wide by 450 deep. Carcasses, shelves, tops and bottoms are powder coated in silver grey
- This fully spot welded construction provides additional strength as well as creates smooth lines and attractive appearance whilst ensuring an easy to clean solution for high-traffic changing room environments
- Solid grade laminate doors available as plant on or inset. Plant on doors have self-cleaning wet area hinges. Inset doors have semi concealed hinges. Doors are manufactured from 10mm Arpa Athlon range with bull nosed edges
- Ideal for all areas with wash down and high hygiene requirements:
  - Food processing plants
  - Dairies
  - Abattoirs
  - Pharmaceutical industry clean areas

## SUPREME LOCKERS

The Supreme Locker range is designed specifically for wet area use, which allows the locker to be exposed to wet or humid atmospheres for long periods & time such as leisure centres, swimming pools and spa changing rooms.

### COMPLIMENTARY PRODUCTS

An extensive range of cloakroom units with matching SGL slats is available, including wet area benching. Single and double sided cloakroom units and hook boards. End panels if required for aesthetic reasons are available.
